SUMMARY

I am a passionate **Full Stack Web Developer** skilled in building responsive, user-friendly, and visually appealing interfaces using **HTML, CSS, JavaScript, Bootstrap, Tailwind CSS , React.js**. With experience in the **Full stack**, I create dynamic, high-performance web applications focused on seamless UI/UX. I am dedicated to continuous learning and delivering creative digital solutions with clean, efficient code.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS , React Js
Backend: PHP, Python , Node Js
Tools: Git, VS Code, Firebase
Others: Python, TensorFlow, AWS, REST APIs

EXPERIENCE

- **Digital Aimz** 🌐
  Full-Stack Developer   01/08/2025 – 30/10/2025
  - Designed and developed fully responsive web pages using HTML5, CSS3, and Bootstrap to ensure cross-device compatibility.
  - Implemented dynamic UI components using JavaScript and DOM manipulation for better user interactivity.
  - Utilized Bootstrap's grid system and utility classes to build flexible, mobile-first layouts efficiently.
  - Improved performance by optimizing CSS/JS, reducing redundancy, and ensuring faster load times.
  - Collaborated with backend developers to integrate APIs and enhance UI consistency.

EDUCATION

- **University of Engineering and Technology, Lahore**   *Lahore, Pakistan*
  Bachelor of Science in Computer Science   September 2021 – May 2025

PROJECTS

- **Marriage Bureau Web Application**   *February 2024 – December 2024*
  Tools: Full Stack (HTML, CSS, JavaScript(ES 6+), Bootstrap, React.Js, Node.Js, Firebase)
  - Developed a full-featured marriage bureau platform with profile creation and matchmaking.
  - Implemented secure user authentication and messaging between users.
  - Built admin dashboards for data management and analytics using React.
  - Applied responsive design principles for mobile-first accessibility.

- **Lung Disease Detection System (AI-Powered Healthcare)**   *August 2023 – January 2024*
  Tools: Python, TensorFlow, Keras, Flask, Pandas, NumPy, Matplotlib, AWS
  - Created a machine learning model to detect lung diseases using X-ray datasets.
  - Built a Flask-based web dashboard for doctors to upload images and view predictions.
  - Visualized accuracy and model performance metrics using Matplotlib.
  - Deployed the application on AWS for scalability and accessibility.

- **Personal Portfolio Website**   *June 2024 – July 2024*
  Tools: React.Js,HTML, CSS, JavaScript, Bootstrap
  - Built a responsive personal portfolio website to showcase projects and contact details.
  - Used Bootstrap's grid system and animations to enhance the visual experience.
  - Optimized for performance and SEO to improve online visibility.
